General Project Area Map

Pollinator Garden Proposed Art and Interpretation Node Locations

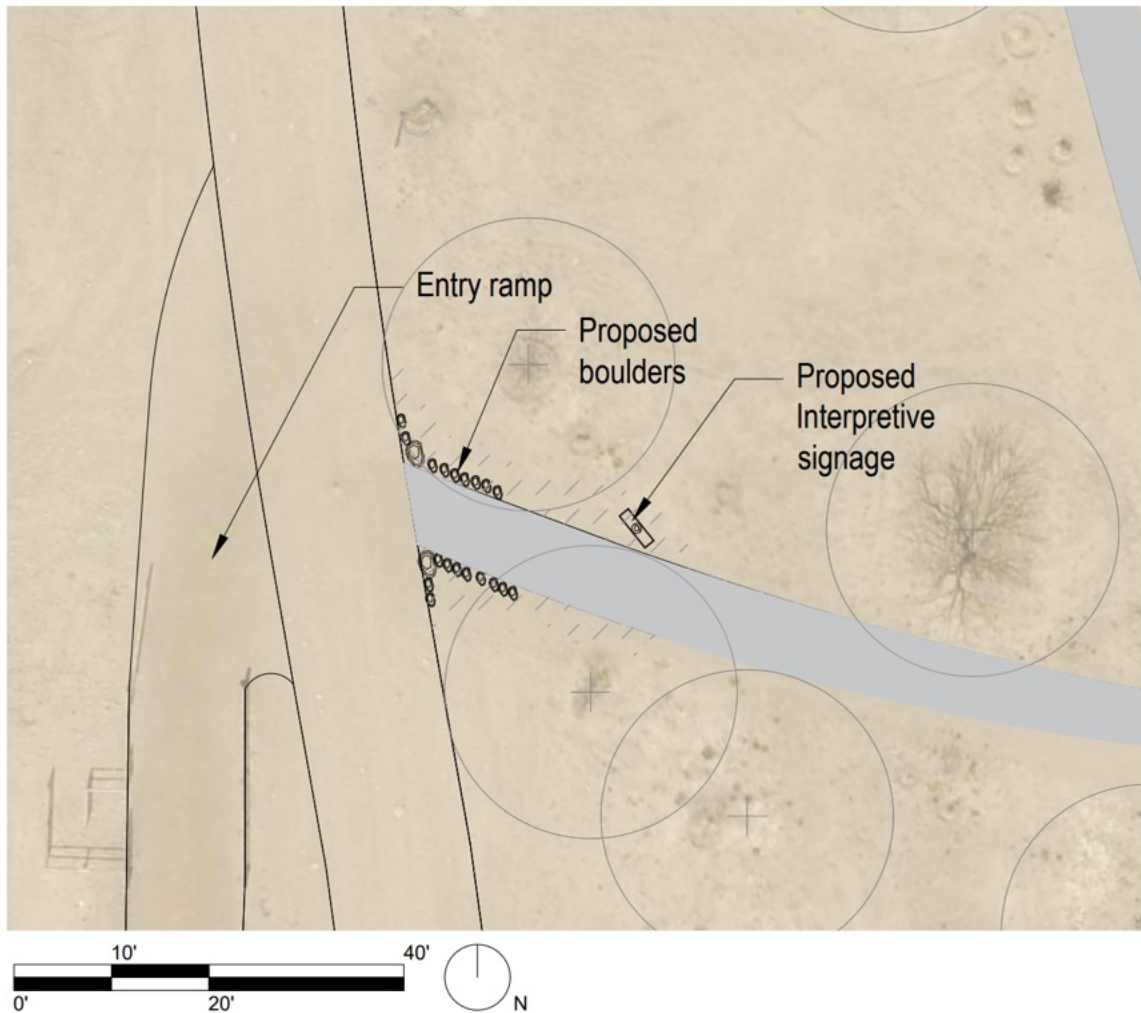

ARTWORK PLACEMENT

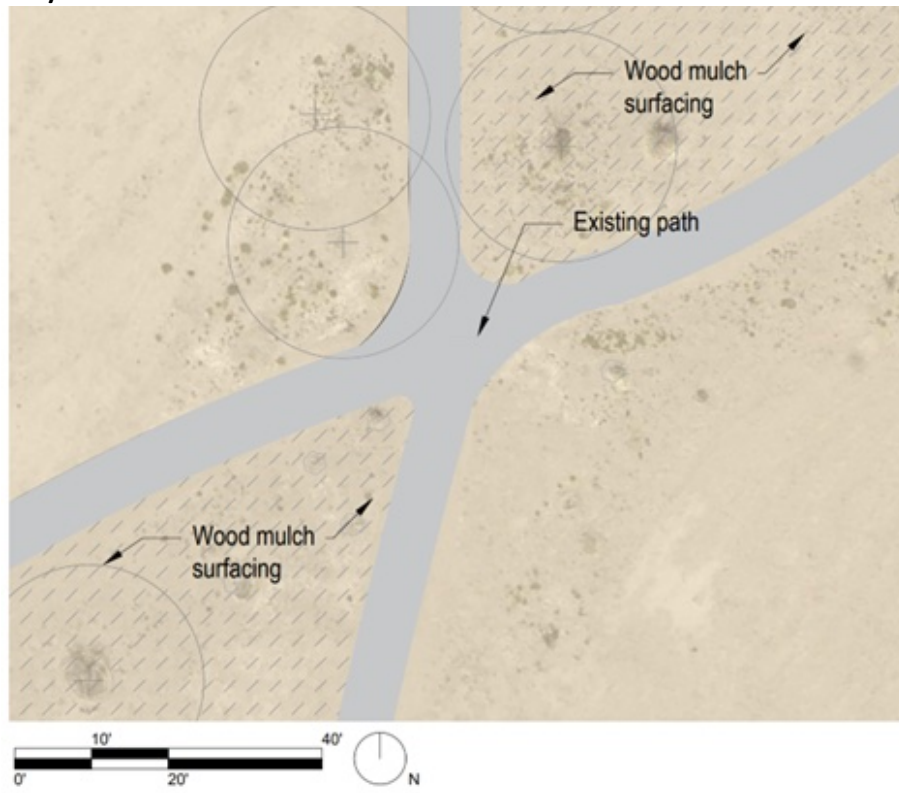

The artwork may be placed or integrated anywhere within the landscape at each of the 3 pollinator education nodes. Placement of the artwork will need to take into consideration the proposed circulation and viewing angles, the existing vegetation, the existing viewsheds on site, and the scale of the features in the landscape to appropriately integrate into the landscape and not detract from existing viewsheds and the landscape-scale character of the area. See Supplementary Resources links provided at the top of the Guidelines.

Node Area Plans – Excerpts from Plan Set

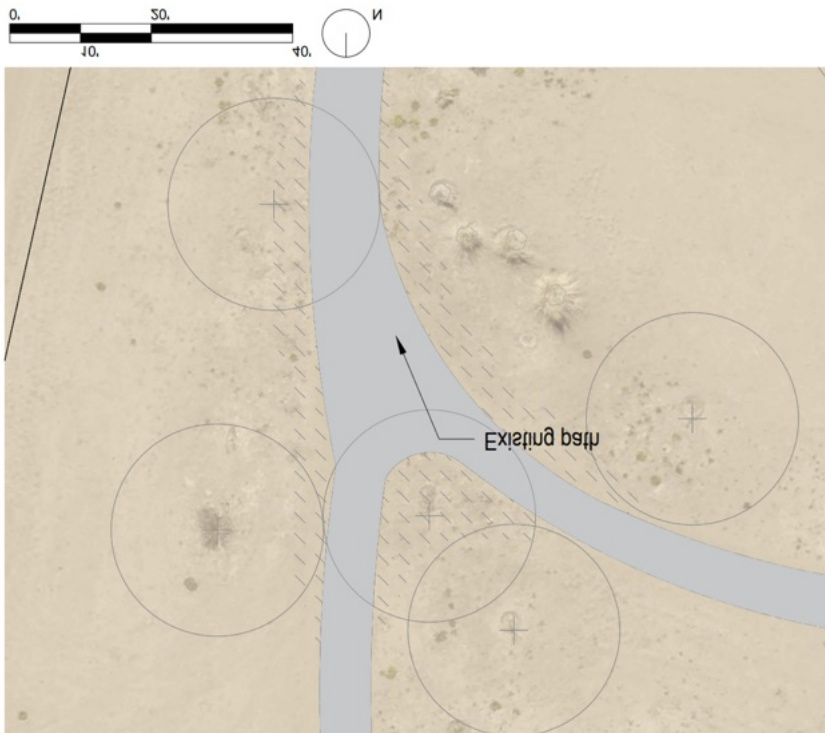

Butterfly / Entryway Node

Bat / Moth Node

Wind Node
