

## Site and Project Description

Two pads have been left open in the sidewalk for the project. The southern void is 41" wide by 24' at the longest point. The northern void is 44" wide and 32.5' at the longest point.

Project ideas submitted by Manitou Springs residents include installing seating areas, sculptures that memorialize the trees removed in 2017, or that create areas of shade on the sidewalk for pedestrians.
