

The site is unique, exciting and prominent. It is located at the junction of two of Little Rock's major streets, Kavanaugh Boulevard and Crestwood Drive. The junction of Kavanaugh and Crestwood is at acute angles and creates a triangular site (see photo below).

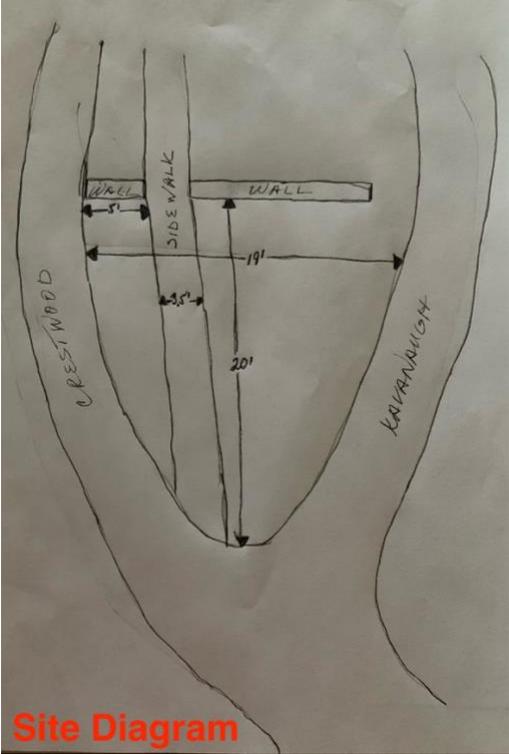

Triangular Site

The back of the triangle has a rock convex wall that is 5 feet tall and has a sidewalk on the Crestwood side that bisects the wall. The sculpture will be placed in front of the wall facing the point (tip) of the triangle. (see photo below)

Wall and Sidewalk view

The sidewalk is 5 feet from Crestwood at the base of the wall and the width of the sidewalk 3.5 feet. The width of the triangle measured at the base of the wall is 19 feet and the triangle is 20 feet from the wall to the rounded tip where the two streets diverge. As you approach the site from the south, Kavanaugh and Crestwood both go up a hill, however the site itself is level. There is a holly tree immediately behind the wall that may or may not be retained. 30 feet behind the wall is a group of crêpe myrtles that will be retained, but the bushes in front of the wall will be removed.

Because of the curve in the roads and the hill behind the sculpture, the maximum visibility will be as you approach from the south going north (up the hill). The base should be of a size to maximize the visibility of the sculpture. The street sign in the site will be removed.

Your responsibility will be to create the sculpture, provide a stamped engineering design of the base, and be available for a sculpture committee interview via Zoom if you are one of the finalists. There is a small chance we will request the finalists be present in Little Rock if we have formal outdoor event. Of course, this all depends on the COVID 19 situation.

If you have questions, please contact me at 501-607-2253.
